Barclay Mains, Linlithgow.
of the yellow flowers of Trollius europaeus, also a fine spike of a purple Orchis, probably O. laitolia. Geum rivale, Galium boreale, and Oxyria
renifolium, are all plentiful. The rarest plant of the place—Lloydia serotina—which grows on the accessible sides of the Kitchen, I did not recognise. It can only be distinguished from grass by the flowers, growing as it does quite out of reach; and the flowers, Mr. Griffith told us, last with marvellous regularity from June 15 to July 9 over.
